

Computer Club Update

Join us for a double-header club meeting where we'll be discussing two exciting topics! First, we'll be delving into how to use your phone as a better camera, covering both iPhone and Android phones. The speaker will provide you with a range of tips and tricks that will help you to take better photos and improve your photography skills. So be sure to bring along your phone so you can follow along with the speaker and practice these techniques in real-time.

In our second segment, we'll be exploring ways to improve and control your home network. Tired of having a spotty Wi-Fi signal? Struggling with "dead spots" in your home? The speaker will show you several ways to extend your network range and improve network performance. We'll cover the latest technology and tools, from Wi-Fi extenders to mesh networks and more. You'll also learn how to secure your home network and protect your devices from online threats.

Whether you're an amateur photographer, a tech enthusiast, or just someone looking to improve your home network, this club meeting has something for you. Join us for an informative and engaging session where you'll learn valuable skills and connect with like-minded people. Don't miss out on this opportunity to improve both your photography skills and home network!
